FIG.8

This diagram shows a perspective view of a liquid crystal panel assembly. It consists of two glass substrates, labeled 1 and 2, which are joined at their edges by a frame-like structure 9A. The interior space between the substrates contains a liquid crystal layer 16. On the inner surfaces of the substrates, there are alignment layers 16a and 16b, and a series of small circular features representing electrodes or pixels, labeled 16c. The assembly is shown from an angle that highlights its three-dimensional structure.
